SUMMARY

Data Analyst with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments to drive operational efficiency

SKILLS

- **Programming:** SQL, Python (Pandas, NumPy, Matplotlib)
- **Visualization:** Power BI, Tableau, MS Excel
- **Analytical:** Exploratory Data Analysis (EDA), Statistical Modeling, Data Cleaning, A/B Testing
- **Tools:** Git/GitHub, VS Code, Streamlit, Cloud Deployment (Railway/Render), MongoDB Atlas

EXPERIENCE

Data Analyst Intern

March 2026 – April 2026

Technohack Solutions

- Conducted extensive data cleaning and exploratory data analysis (EDA) on large-scale datasets, ensuring accurate data preparation for analytical modeling.
- Developed and maintained automated dashboards in Power BI to monitor business KPIs, assisting the team in tracking monthly performance metrics.
- Collaborated in a team-based environment to translate business requirements into technical insights and actionable data visualizations.

PROJECTS

Airbnb Clone & Market Analytics Platform

April 2026 – May 2026

- Engineered a full-stack platform from scratch, managing end-to-end data flow from frontend user interactions to backend SQL database storage.
- Architected the database schema (8+ tables) with a focus on data normalization, ensuring the system is optimized for both transactional integrity and analytical querying.
- Integrated Power BI with the production database to transform raw listing and user data into actionable insights, visualizing platform performance metrics.

AI-Powered Data Analytics Chatbot

March 2026 – April 2026

- Developed an interactive analytics application using Streamlit that enables users to upload CSV/Excel files for automated exploratory data analysis.
- Integrated Generative AI/LLMs to interpret raw data and generate natural language business reports, summaries, and actionable insights with 92% accuracy.
- Built efficient data preprocessing pipelines to clean, validate, and visualize datasets, significantly reducing manual report generation time by 35%.

Customer Trend Analysis

Feb 2025 – March 2026

- Executed comprehensive behavioral analysis on 12,450+ customer records to detect purchasing patterns, seasonal cycles, and churn risk factors.
- Engineered advanced feature metrics, including AOV (Average Order Value) and purchase frequency cohorts, to refine customer segmentation.
- Visualized high-impact trends using Python-based libraries, providing data-backed recommendations to improve customer retention and marketing ROI.

EDUCATION

Bachelor of Engineering in Computer Engineering

Siddhant College, Pune

2022 – 2026

CGPA: 8.0/10
